

**A cross-platform documentary by Liz Marshall,
featuring animal rights photographer Jo-Anne McArthur.**

**THE GHOSTS IN OUR MACHINE illuminates the lives of individual animals
living within or rescued from the machine of our modern world.
Scientists, doctors, activists and industry shed new light
on the complex social issue of animal rights.**

Quietly staggering, suffused with uncommon intellectual clarity, emotional honesty,
and (I dare say) cinematographic genius.

- T.E.M STYLE

Finally the conversation about our moral relationship to non-human life has begun.

- KERRY BOWMAN, Conservationist, President/Founder, Canadian Ape Alliance

I only hope that THE GHOSTS IN OUR MACHINE can change the way people treat animals
the way "Food, Inc." changed the way people eat.

- JASON PRIESTLEY, Actor

Liz Marshall's multimedia platform – the film, website, and overall online presence –
is filling a void in the world of social justice.

- JASMIN SINGER & MARIANN SULLIVAN, Our Hen House
